

LASTING ELEGANCE

ENTRY AND ALUMINUM STORM DOORS 2010

LASTING ELEGANCE ENTRY DOORS

Lasting Elegance - begins with **SafeGuard™** Customer satisfaction is exactly what we deliver at Household Metals Inc. Homeowners looking to purchase a new door find that we set the industry standard for custom, top of the line home entryways. Each door produced by our assembly line comes with the **SafeGuard™** Advantage, which promises our customers a high quality entry door guaranteed not to rust, shrink, split, or delaminate.

Our advanced production facilities make HMI one of the few companies that manufacture doors according to customer specifications. We are a make-to-order company treating each door as a custom door whether it is a standard size or not. We offer the most secure door on the market because our 19" lock block has a 14 gauge steel reinforcement channel along with a 20 gauge steel door skin. This combination offers 40% more protection than home center doors. The **SafeGuard™** Advantage can provide your home with beauty, security, and the guarantee of a lifetime.

DOOR STYLES

HMI is the one-stop-shop for all your entryway door needs whether it's our Fiberglass or Steel Entry Doors, Aluminum Storm Doors, Security Storm Doors or an entryway with a custom arch top. With over 80 available door styles, **SafeGuard™** entry doors can accommodate all customer needs and wants.

GLASS STYLES

HMI offers a comprehensive collection of decorative glass for doors, sidelites, and transoms. By purchasing our glass from 4 major glass suppliers, it allows us to offer our customers an extensive selection.

VARIETY

HMI doors are designed to the highest standards of energy efficiency, security, and sturdiness without sacrificing beauty. All of our entry doors are available in: steel - textured and smooth finishes; and fiberglass - in textured only. Made to enhance your entryway and satisfy your unique taste, we offer a variety of rich colors with a vast selection of glass styles.

ELITE STORM DOORS

HMI's *Elite Series* embraces balance and proportion while using durable design concepts and long lasting materials. *Elite* is all about providing comfort, light, distinction, and value.

DOOR STYLES

With ten distinctive styles to choose from your preference is always met. Whether it is a classic full view or convenient self-storing storm door you get what you want.

GLASS STYLES

With traditional clear glass, grooved glass and glass with coming you can choose the look that fits your style.

SLIDING SCREEN

One of HMI's newest additions is the innovative Sliding Screen Door. Exclusively manufactured by HMI, the Sliding Screen Door features a unique aluminum extruded design ensuring highest quality construction and durability. Unlike other sliding screens where all the weight is placed upon a floor mounted track, HMI's design uses a dual-wheel hung design allowing for a smooth and stress-free operation.

Customers can choose from either a Single Sliding Screen configuration (*Illustrated to the right*) or a Dual Sliding Screen configuration.

THE FIBERGLASS ADVANTAGE

In addition to Steel Entry Doors, HMI also offers a wide range of Fiberglass Entry Doors. Available in textured surface, Fiberglass doors feature the beauty and detail of conventional wood doors but with added insulation value provided by the solid foam core and composite stiles and rails. All Fiberglass Doors are available in any HMI paint or stain finish.

Refer to pages 26-29 for more styles to choose from.

THE SAFEGUARD™ ADVANTAGE

▼ HME 246 Door

Vinyl Rain Cap

Full perimeter Thermal Break

Dual U-Channel Steel Door Edges

Over 30 Different Colors available, and 6 Stain Finishes

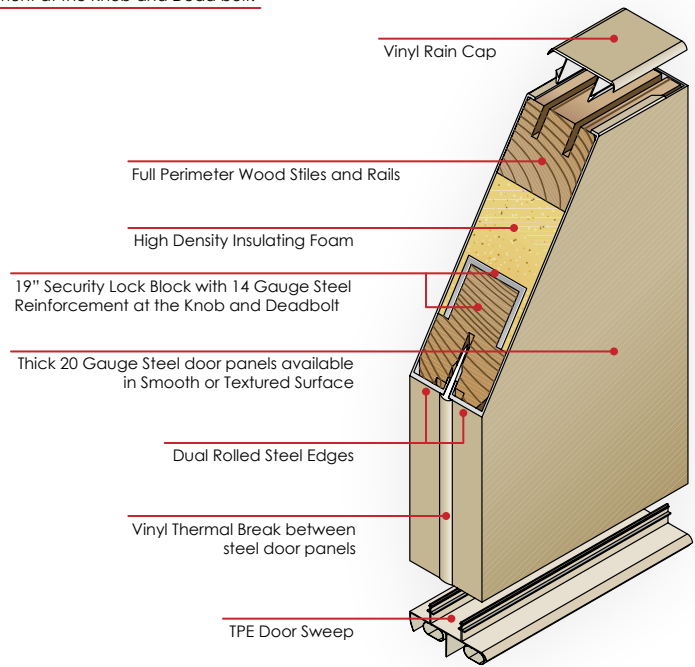

Thick 20 Gauge Steel door panels available in Smooth or Textured Surface

Pressurized High Density Polyurethane Insulating Foam

19" Security Lock Block with 14 Gauge Steel Reinforcement at the Knob and Dead bolt.

SafeGuard™ steel doors are warranted not to warp, split, shrink, or delaminate for as long as you own your home. *See warranty for additional details.*

The Dual U-Channel Steel Door Edges are custom made to the customer's specific door width instead of the conventional width-cut-down door slab. The 3-Dimensional design provides structural strength against warping and resistance against splitting from break-in attempts. In addition, the full perimeter of the door is sealed with a polymer thermal break providing greater insulation value and preventing any exposed steel edges.

Vinyl Rain Cap

Full Perimeter Wood Stiles and Rails

High Density Insulating Foam

19" Security Lock Block with 14 Gauge Steel Reinforcement at the Knob and Deadbolt

Thick 20 Gauge Steel door panels available in Smooth or Textured Surface

Adjust & Lock Threshold with Thermal Break

NEW CONSTRUCTION JAMBS

Primed Wood Jamb - Standard

These jambs are vinyl wrapped treated wood for standard sizes: 4 9/16"; 5 1/4"; 6 9/16"; and all other sizes are made of treated wood with aluminum capping. Both vinyl wrapped and aluminum capped jambs are available in smooth and textured surfaces, which can be finished to match the door color. The treated wood underlay is damage resistant to the elements. Whether you have the vinyl wrapped or aluminum capping they are the finishing touch to a sophisticated entrance.

Ultraframe™ Reinforcement - Optional

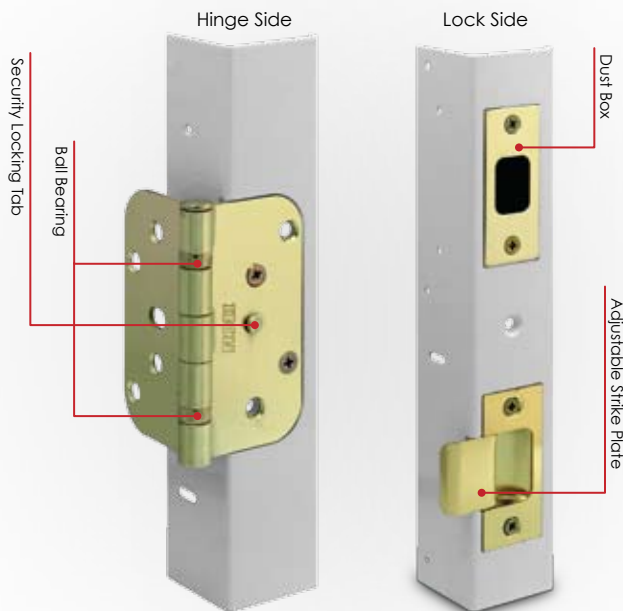

Exclusively by HMI our Patented Ultraframe™ allows you to have an elegant entryway with extra security. Each Ultraframe™ has 18 gauge reinforcement steel plates placed behind the deadbolt, knob, and hinges. The steel reinforcement plates are constructed in an "L" shape, which provides strength for a stronger mounting point and resistance against break-ins.

18 Gauge Steel Reinforcement
ULTRAFRAME™
Lock Side

Exclusive HMI Security Tab at Knob Location

18 Gauge Steel Reinforcement

Hinge Side

STEEL REPLACEMENT FRAME

Steel Replacement Frames are also available if preferred over a new construction jamb. The frame is constructed of heavy gauge galvanized steel with 10 gauge plates located on the lock and hinge sides for extra reinforcement to help keep intruders out. All replacement frames are finished with a powder coating.

Stained Painted Unfinished Primed

3 1/4 Colonial

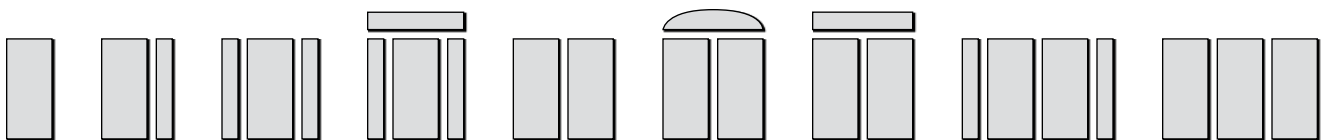

2 3/4 Colonial

2 3/4 Clamshell

INTERIOR CASING

Interior casing can be painted or stained to match interior decor, supplied primed or unfinished for customer to finish.

JAMB & FRAME UNIT OPTIONS

HMI offers an almost endless amount of Jamb & Frame Configurations. Illustrated here are the most common configurations, but customers may order any configuration they choose.

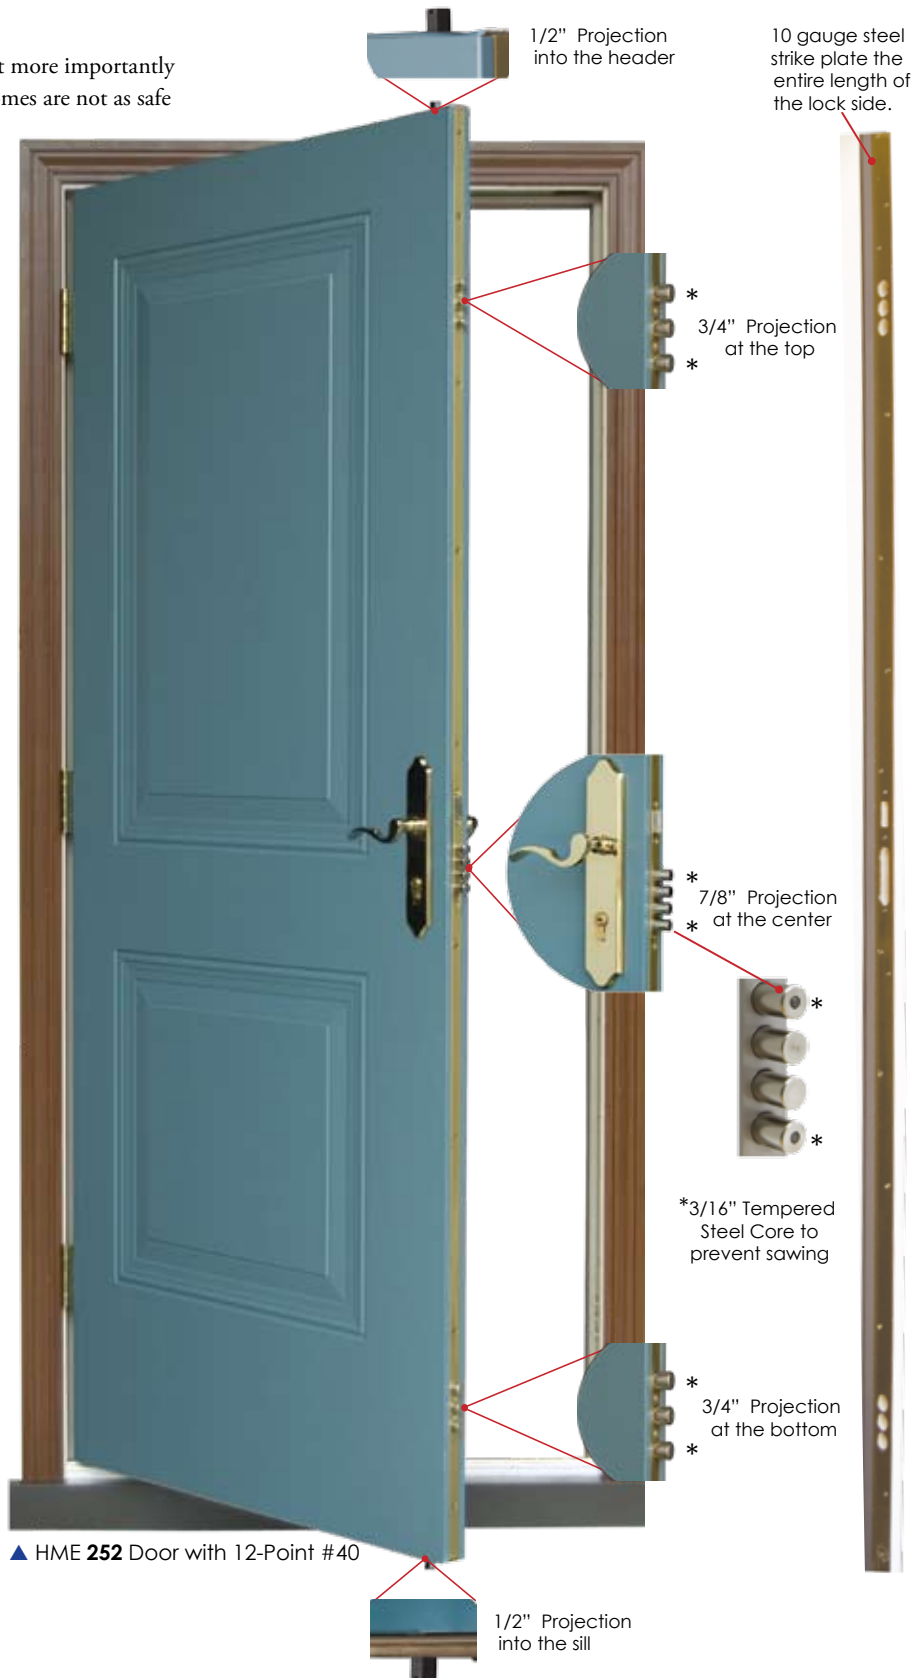

12 POINT LOCKING SYSTEM

Home is our safe shelter

It is a place where we find comfort. It protects our possessions, but more importantly it protects you and your family members. Unfortunately, many homes are not as safe as the owner's think:

- Every 14 seconds a home is burglarized.
- More than 50 percent of all residential burglaries, entry is gained through a door.
- High quality 20 gauge steel doors, locks and key control are your first line of defense against a break-in.
- If you have a standard key, it can be copied at any hardware store. Ezcurra security keys can only be duplicated through SafeGuard™ Doors by using a supplied security key card.
- With Ezcurra you don't have to worry that someone has a key that you don't know about, and who might use it to unlock your door.

- Burglary Resistant - High quality locks protect you, your loved ones, and your possessions
- Twelve points of contact, ten horizontal backsets, two vertical backsets
- * • Six of the deadbolts are inserted with tempered steel pins to prevent sawing
- Cylinders are drill proof by tempered steel pins
- Anti - picklock profile
- Cylinders have double pin rows on both sides, this coupled with an extra locking device on the side, makes these cylinders highly sophisticated
- Optional anti-panic hardware available
- Concealed, tamper-proof deadbolts leaving a flush door surface
- Locks are fire rated
- Lifetime mechanical warranty
- Beautifully designed handlesets to compliment any style entrance
- Single or double cylinder located at the handle for easy access and fast exit
- If keys are lost, only the cylinder would need to be changed
- Available for doors from 74" to 96"
- Available in replacement and new construction steel doors
- Factory installed (only handles installed on-site)

FRENCH SIDELITES

French Sidelites work just like our Double Doors to provide you with another innovative option.

Hinged on opposite sides of the jamb, French Sidelites allow for the sidelite and door to be opened simultaneously, providing a larger entryway opening.

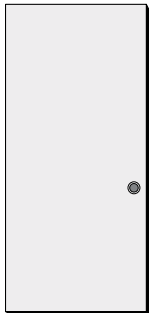

Enjoy the beauty of a classic door and sidelite with the practical space to move household appliances and furniture through.

PAINT, POWDERCOAT AND STAINS

Paint (P - Matching Powder Coat finish for Aluminum and Security Storm doors)

Stain Finishes (For Entry Doors Only)

Note: These sample colors do not accurately reflect actual painted/stained or powdercoated surface colors due to limitations in the printing process. Please see your sales representative for SafeGuard™ color chips.

All 20 gauge **SafeGuard™** steel entry doors are galvanized to A40 and chem treated to prevent rusting. **SafeGuard™** steel and fiberglass doors are first primed with a durable undercoat that is oven-cured for lasting resiliency.

Paint - A final paint finish is applied to the doors and oven-cured a second time forming an enduring lustrous look.

Stain - Hand applied to give a wood grain appearance, it is then top coated with a 2-part clear urethane protective coat with a UV inhibitor. It is then oven-cured a second time forming an enduring lustrous look.

Powdercoat - Aluminum and security storm doors are chem washed then oven dried. The powdercoating is electrostatically applied and double baked to create a durable resilient finish.

* Due to possible heat buildup, the warranty for entry doors does not apply to the door or glass trim painted in these colors when installed behind storm doors.

** Trim color only
