

LASTING ELEGANCE

ENTRY AND ALUMINUM STORM DOORS 2011

HMI is the one-stop-shop for your entryway needs, whether it's our Entry Doors; Aluminum Storm Doors; or Security Storm Doors. Our advanced production facilities make HMI one of the few companies that manufacture doors according to customer specifications. We are a *make-to-order* company treating each door as a custom door whether it is a standard size or not.

DOOR STYLES

Lasting Elegance Entry Doors

HMI's entry doors are designed to the highest standards of energy efficiency, security, and sturdiness without sacrificing beauty. They are available in: *steel* - smooth or textured finishes; and *fiberglass* - textured. Made to enhance your entryway and satisfy the unique taste of each homeowner, we offer a variety of rich colors with a comprehensive collection of decorative glass.

We set the industry standard for custom, top of the line entry doors. With over 80 available door styles (also available in 5 archtop styles), our entry doors can accommodate all homeowner needs and wants. We offer the most secure steel door on the market because our 19" lock block has a 14 gauge steel reinforcement channel along with a 20-gauge steel door skin. This combination offers 40% more protection than home center doors.

Elite Storm Doors

HMI's storm doors embrace balance and proportion while using durable design concepts and long lasting materials. *Elite* is all about providing comfort, light, distinction, and value. We offer 10 distinctive styles to assure your preference is always met. Whether it is a classic full view or convenient self-storing storm door you get what you want. With traditional clear glass, grooved glass and glass with coming you can choose the look that fits your style.

Security Storm Doors

HMI's security storm doors create harmony between security and style. Heavy 16 gauge welded steel frame tempered glass and 70 styles to choose from will satisfy your need for safety while meeting your style standards.

The heavy-duty hinges have steel vault pins to keep the door secure even when tested by the elements. They are tamper resistant to provide added safety against break-ins. The adjustable pneumatic closer allows you to set how fast or slow your door will close. The extruded metal Z-bar with weather-stripping ensures a tight seal against the elements.

Custom made to fit your entryway our security storm doors are available in 5 arch top styles. The HMI Security Storm Door gives you the peace of mind you need and the beauty you desire.

THE FIBERGLASS ADVANTAGE

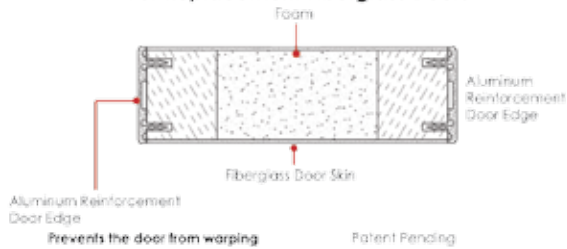

In addition to Steel Entry Doors, HMI also offers a wide range of Fiberglass Entry Doors. Available in textured finish, Fiberglass doors feature the beauty and detail of conventional wood doors but with added insulation value provided by the solid foam core and composite stiles and rails. All Fiberglass Doors are available in any HMI paint or stain finish.

Refer to pages 26-29 for more styles to choose from.

MINI BLIND ENTRY DOORS

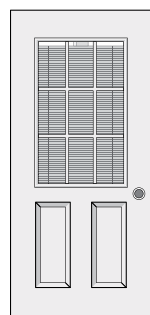

Thermally sealed between two pieces of tempered glass, Internal Blinds combine the privacy and light control of conventional blinds, with a hassle-free internal design requiring no dusting at all. Simply use the top control to tilt through a full 180° rotation or use the side control to raise or lower the blinds. **Mini Blinds are available in Low-E glass only.**

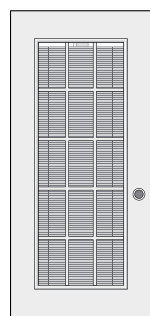

Note: There is a 1/4" gap between the edge of the blind - left, right and bottom - and the glass trim. This ensures proper operation when raising and lowering the blinds.

SLIDING SCREEN

Exclusively manufactured by HMI, the Sliding Screen Door features a unique aluminum extruded design ensuring highest quality construction and durability. Unlike other sliding screens where all the weight is placed upon a floor mounted track, HMI's design uses a dual-wheel hung design allowing for a smooth and stress-free operation.

Customers can choose from either a Single Sliding Screen configuration or a Dual Sliding Screen configuration. *(Illustrated to the right)*

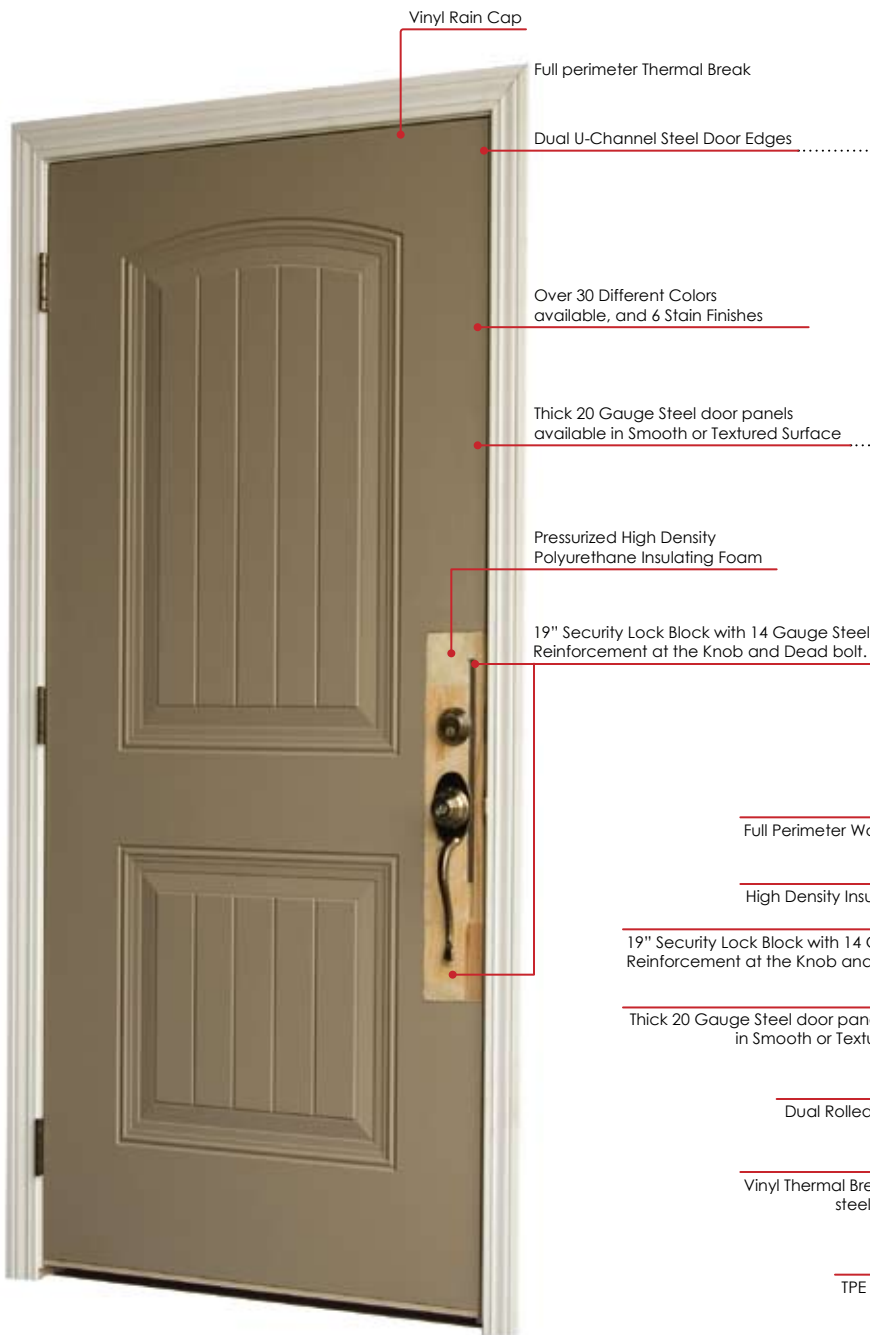

▼ HM 345 Doors in a Patio Configuration ▼

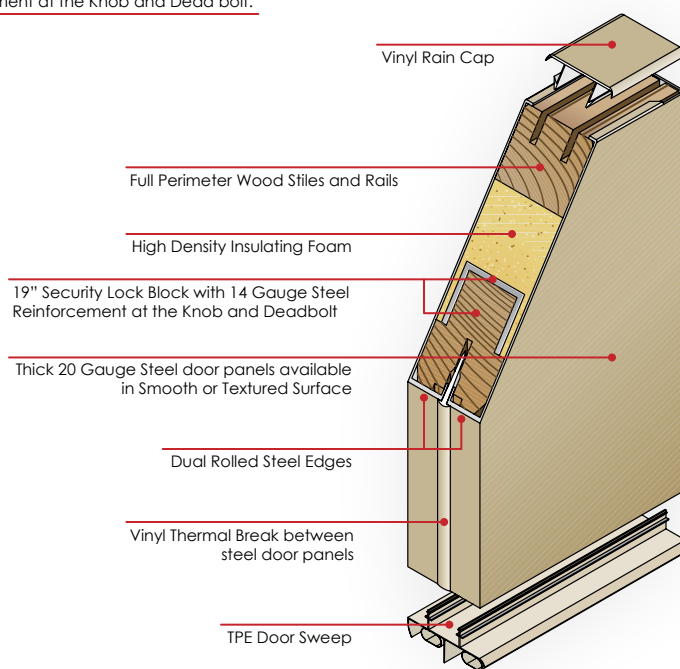

THE SAFEGUARD™ ADVANTAGE

▼ HME 246 Door

SafeGuard™ steel doors are warranted not to warp, split, shrink, or delaminate for as long as you own your home. *See warranty for additional details.*

The Dual U-Channel Steel Door Edges are custom made to the customer's specific door width instead of the conventional width-cut-down door slab. The 3-Dimensional design provides structural strength against warping and resistance against splitting from break-in attempts. In addition, the full perimeter of the door is sealed with a polymer thermal break providing greater insulation value and preventing any exposed steel edges.

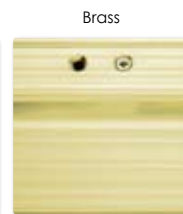

Magnetic Weather-strip
for positive air seal along the header and lock side

Q-Lon Weather-strip
for compression weather seal along hinge side

Anti-Pry Ball Bearing Hinges
Available in Aged Bronze, Satin Nickel, Polished and Antique Brass

NEW CONSTRUCTION JAMBS

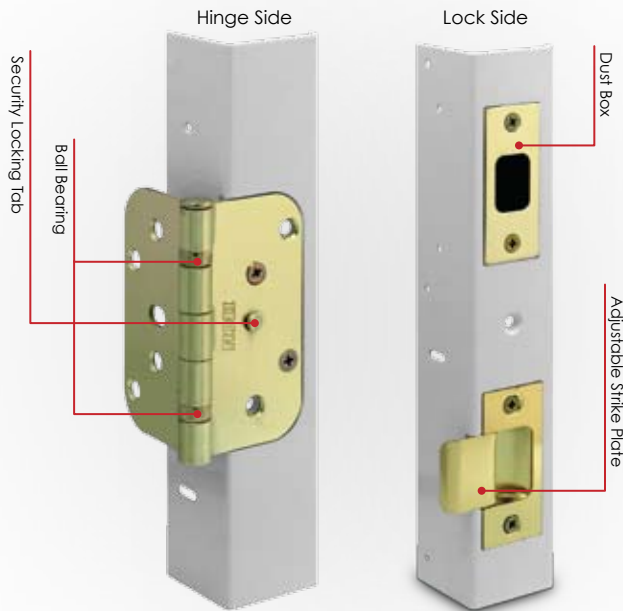

Primed Wood Jamb - Standard

These jambs are vinyl wrapped treated wood for standard sizes: 4 $\frac{9}{16}$ "; 5 $\frac{1}{4}$ "; 6 $\frac{9}{16}$ "; and all other sizes are made of treated wood with aluminum capping. Both vinyl wrapped and aluminum capped jambs are available in smooth and textured surfaces, which can be finished to match the door color. The treated wood underlay is damage resistant to the elements. Whether you have the vinyl wrapped or aluminum capping they are the finishing touch to a sophisticated entrance.

Ultraframe™ Reinforcement - Optional

Page 14 Price Book

Exclusively by HMI our Patented Ultraframe™ allows you to have an elegant entryway with extra security. Each Ultraframe™ has 18 gauge reinforcement steel plates placed behind the deadbolt, knob, and hinges. The steel reinforcement plates are constructed in an "L" shape, which provides strength for a stronger mounting point and resistance against break-ins.

18 Gauge Steel Reinforcement

ULTRAFRAME™

Lock Side

Exclusive HMI Security Tab at Knob Location

18 Gauge Steel Reinforcement

Hinge Side

STEEL REPLACEMENT FRAME

Steel Replacement Frames are also available if preferred over a new construction jamb. The frame is constructed of heavy gauge galvanized steel with 10 gauge plates located on the lock and hinge sides for extra reinforcement to help keep intruders out. All replacement frames are finished with a powder coating.

INTERIOR CASING

Interior casing can be painted or stained to match interior decor; supplied primed; or unfinished for customer to finish.

JAMB & FRAME UNIT OPTIONS

HMI offers an almost endless amount of Jamb & Frame Configurations. Illustrated here are the most common configurations, but customers may order any configuration they choose.

12 POINT LOCKING SYSTEM - #40

Home is our safe shelter

It is a place where we find comfort. It protects our possessions, but more importantly it protects you and your family. Unfortunately, many homes are not as safe as the owner's think:

- Every 14 seconds a home is burglarized.
- More than 50 percent of all residential burglaries, entry is gained through a door.
- High quality 20 gauge steel doors, locks and key control are your first line of defense against a break-in.
- If you have a standard key, it can be copied at any hardware store. Ezcurra security keys can only be duplicated through HMI Doors by using a supplied security key card.
- With Ezcurra you don't have to worry that someone has a key that you don't know about, and who might use it to unlock your door.
- Twelve points of contact, 10 horizontal backsets, 2 vertical backsets
- 10 Gauge steel strike plate the entire length of the lock side
- Anti-pick and anti-drill proof
- Concealed, tamper-proof deadbolts
- Available in replacement and new construction
- Available in doors up to 96" in height
- Available in smooth and textured steel doors
- Locks are factory installed (only handles installed on-site)

Existing unsightly secure door

FRENCH SIDELITES

French Sidelites work just like our Double Doors to provide you with another innovative option.

Hinged on opposite sides of the jamb, French Sidelites allow for the sidelite and door to be opened simultaneously, providing a wider entryway opening.

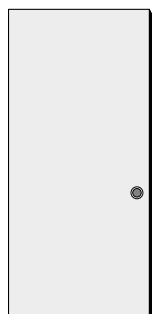

Enjoy the beauty of a classic door and sidelite with the practical space to move household appliances and furniture through.

Extruded Aluminum Corner Bracing System

HMI takes durability to the next level by introducing a specially reinforced aluminum corner gusset system, adding a .65" thick high grade aluminum walls, and making a number of design enhancements as well as supplying the heaviest gauge aluminum offered by any door manufacturer resulting in a stable door that resists twisting and denting.

19 powdercoat colors to match entry door and over 200 custom colors to choose from

Heat Ventilation System - Optional

Another feature offered by HMI is the Storm Door Heat Ventilation system. Occasionally heat becomes trapped in between the storm door and entry door leading to condensation build-up or damage to the entry door's paint finish. However, with the help of our Heat Ventilation system, the hot air is given a path to exit. On the top edge of the storm door, as illustrated below, are a series of holes and a vent cap that can be opened during the summer and closed during the winter.

Opened Vent Cap

Cam Lock System

Offered exclusively by HMI, the Patent Pending Cam Lock System is one of the Elite Storm Doors innovations. Other cam lock designs, offered by the competition, use hand tightened screws along with various plastic pieces that may break or come loose over the years. HMI's Cam Lock System is free of loose parts and accessories, giving the homeowner problem free operation.

All the hardware is hidden inside the door, making it hassle-free to replace your screen. One quick turn to loosen and another one to tighten!

Aluminum Extruded Hinges

Continuous Extruded Hinges, manufactured exclusively by HMI, surpass the quality and durability of anything else offered on the market. Extending from top to bottom, and reinforced with a stainless steel rod, our Extruded Hinges will never sag or warp from the weight of the door. Thus ensuring a perfect fit every time you close your Storm Door.

Note: These sample colors do not accurately reflect actual painted/stained or powdercoated surface colors due to limitations in the printing process. Please see your sales representative for HMI color chips.

All 20 gauge **HMI** steel entry doors are galvanized to A40 and chem treated to prevent rusting. **HMI** steel and fiberglass doors are first primed with a durable undercoat that is oven-cured for lasting resiliency.

Paint - A final paint finish is applied to the doors and oven-cured a second time forming an enduring lustrous look.

Stain - Hand applied to give a wood grain appearance, it is then top coated with a 2-part clear urethane protective coat with a UV inhibitor. It is then oven-cured a second time forming an enduring lustrous look.

Powdercoat - Aluminum and security storm doors are chem washed then oven dried. The powdercoating is electrostatically applied and double baked to create a durable resilient finish. Powdercoats have a glossier sheen than do paints.

* Due to possible heat buildup, the warranty for entry doors does not apply to the door or glass trim painted in these colors when installed behind storm doors.

** Trim color only
