

LASTING ELEGANCE

ENTRY AND ALUMINUM STORM DOORS 2013-2014

HMI is the one-stop-shop for your entryway needs, whether it's our Entry Doors; Aluminum Storm Doors; or Security Storm Doors. Our advanced production facilities make HMI one of the few companies that manufacture doors according to customer specifications. We are a *make-to-order* company treating each door as a custom door whether it is a standard size or not.

DOOR STYLES

Lasting Elegance Entry Doors

HMI's entry doors are designed to the highest standards of energy efficiency, security, and sturdiness without sacrificing beauty. They are available in: *steel* - smooth or textured finishes; and *fiberglass* - textured. Made to enhance your entryway and satisfy the unique taste of each homeowner, we offer a variety of rich colors with a comprehensive collection of decorative glass.

We set the industry standard for custom, top of the line entry doors. With over 80 available door styles (also available in 5 arch top shapes), our entry doors can accommodate all homeowner needs and wants. We offer the most secure steel door on the market because our 19" lock block has a 14 gauge steel reinforcement channel along with a 20-gauge steel door skin. This combination offers 40% more protection than home center doors.

Elite Storm Doors

HMI's aluminum storm doors balance function and style. Designed to protect your entry door from the elements, they are heavy duty and built to last while providing distinction and style. With 12 door styles and 24 matching entry door colors to choose from your preference is sure to be met. Whether it is a classic full view or convenient self-storing storm door, you get what you want. Choose from traditional clear glass, grooved glass or glass with coming to get the look that fits your style.

Our extruded aluminum arch top doors are pre-formed to fit your opening. The glass is held in place using our cam lock system giving a secure fit.

Security Storm Doors

HMI's security storm doors create harmony between security and style. Heavy 16 gauge welded steel frame, tempered glass and 70 styles to choose from will satisfy your need for safety while meeting your style standards.

The heavy-duty hinges have steel vault pins to keep the door secure even when tested by the elements. They are tamper resistant to provide added safety against break-ins. The adjustable pneumatic closer allows you to set how fast or slow your door will close. The extruded metal Z-bar with weather-stripping ensures a tight seal against the elements.

Custom made to fit your entryway, our aluminum and security storm doors are available in 5 arch top shapes.

PROUDLY MADE IN THE U.S.A.

Aluminum Reinforcement Door Edge For Replacement Fiberglass Doors

Aluminum Reinforcement Door Edge
4 Prevents the door from warping

Patent Pending

CHERRY GRAIN

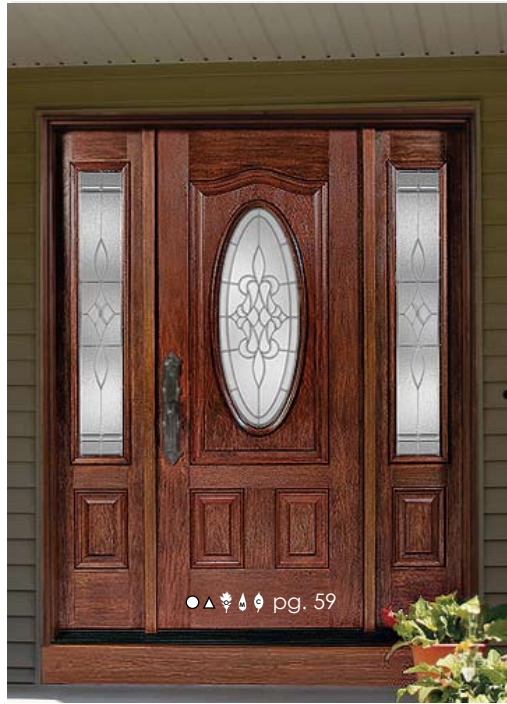

Cherry, native to the northern temperate regions of the globe is known as a premium hard-wood. Its distinctive wood grain pattern of elongated ovals and intermittent collinear lines captures the attention of the on looker. HMI's cherry grain fiberglass doors replicate this unique appearance.

ASPEN FIBERGLASS COLLECTION

The Aspen Collection boasts elegance, energy efficiency and enhanced security, an unprecedented combination in fiberglass doors. With exotic wood grain finishes – mahogany or cherry – and six rich stain colors it is hard to bypass the beauty.

Security has always been a concern when choosing a fiberglass entry door. Not any more! The HMI Aspen Collection has a full length 4" lock side stile that is made of finger jointed pine with a solid oak edge. The 7 gauge steel plate that is embedded the entire length of the stile (patent pending) adds increased security and stability to the fiberglass shell.

This combined with the ArmorMax Jamb™ System, for pre-hung doors, makes the Aspen Collection burglar resistant. No other fiberglass door on the market can meet the security level of the Aspen Collection.

MAHOGANY GRAIN

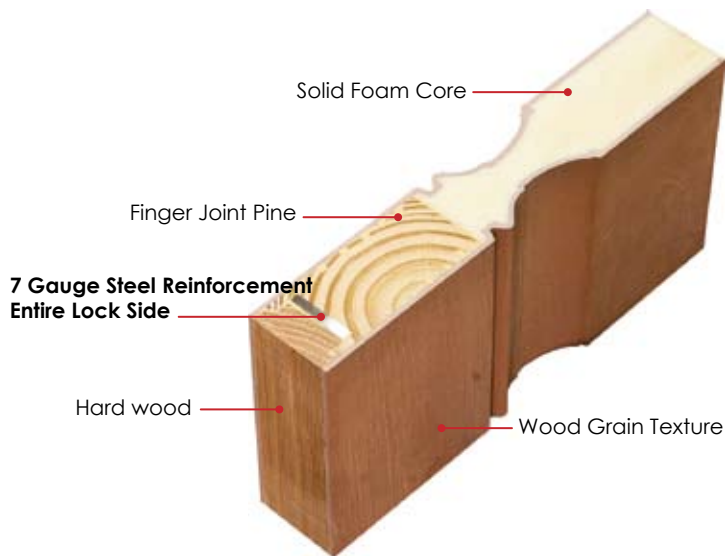

CHERRY GRAIN

HME 266STA-PL Door and HSE 268STA-PL Sidelites ▲

THE COMPONENTS

ASPEN - LOCK SIDE STILE *Patent Pending*

ARMORMAX JAMB™ *Patent Pending*

Replacement entry doors emerged during the 1970's. The steel "L" frame shored up the jamb giving it the security that homeowners desired. The ArmorMax Jamb™ System replicates that security with an 18 gauge steel "L" frame is embedded in the jamb on the lock side. The hinge side is optional.

OAK GRAIN

Oak, native to the northern hemisphere is the most prolifically used wood for its strength and grain pattern. Its deep swirls and lines give it a distinguished look. HMI's oak grain fiberglass and textured steel doors mirror a natural oak grain.

MAHOGANY GRAIN

Mahogany, native to Latin America is considered a premier exotic wood. With its fine texture and uniform interlocking straight and curvy lines distinguishes it from other wood grains. HMI's mahogany grain fiberglass doors capture this unique look.

INTERNAL MINI BLINDS

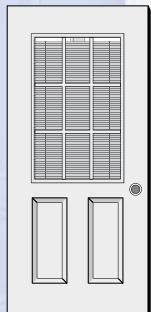

Thermally sealed between two pieces of tempered glass, Internal Blinds combine the privacy and light control of conventional blinds, with a hassle-free internal design requiring no dusting at all. Simply use the top control to tilt through a full 180° rotation or use the side control to raise or lower the blinds.

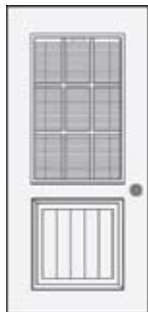

Note: There is a ¼" gap between the edge of the blind - left, right and bottom - and the glass trim. This ensures proper operation when raising and lowering the blinds.

PATIO DOOR

DOUBLE DOORS AVAILABLE WITH DUAL SLIDING SCREEN

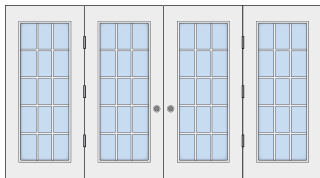

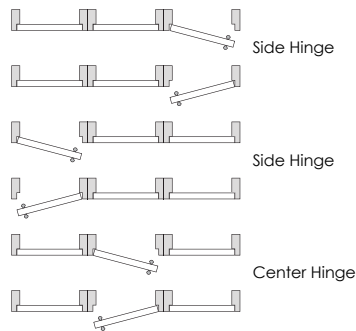

Available in all HMI door styles.

Patio Door Configuration

Triple Patio Door Configuration

Double Door French Configuration

SLIDING SCREEN

Exclusively manufactured by HMI, our Sliding Screen Door features a unique aluminum extruded design ensuring highest quality construction and durability. Unlike other sliding screens where all the weight is placed upon a floor mounted track, HMI's design uses a dual-wheel hung design allowing for a smooth and stress-free operation.

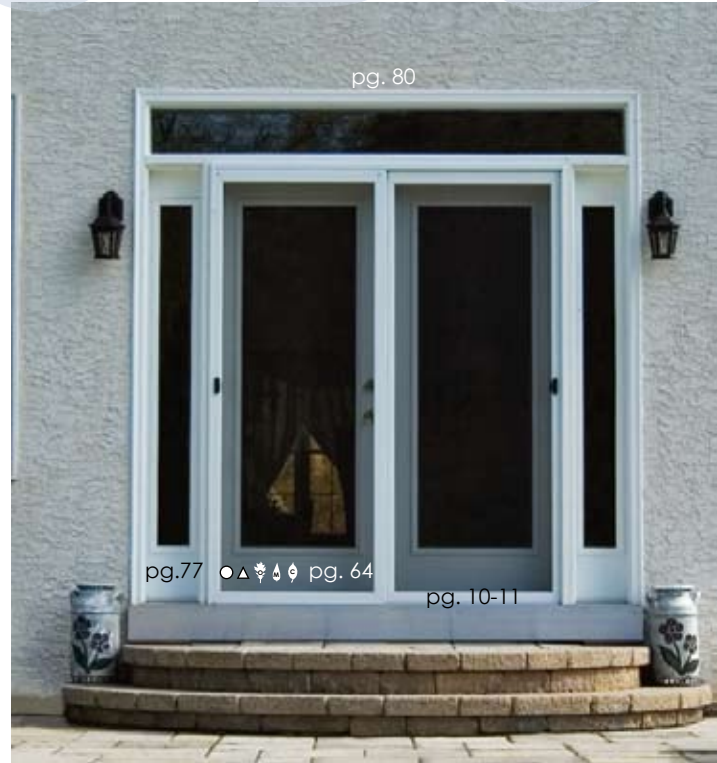

Single Sliding Screen configuration used for patio doors and Dual Sliding Screen configuration used for double doors. (Illustrated to the right)

Screen Options Page 10-11 in Price Book

Inswing Patio and Double Door, screens are on the outside of the house. **Outswing** Patio and Double Door, screens are on the inside of the house.

HM 345 Doors in a Patio Configuration

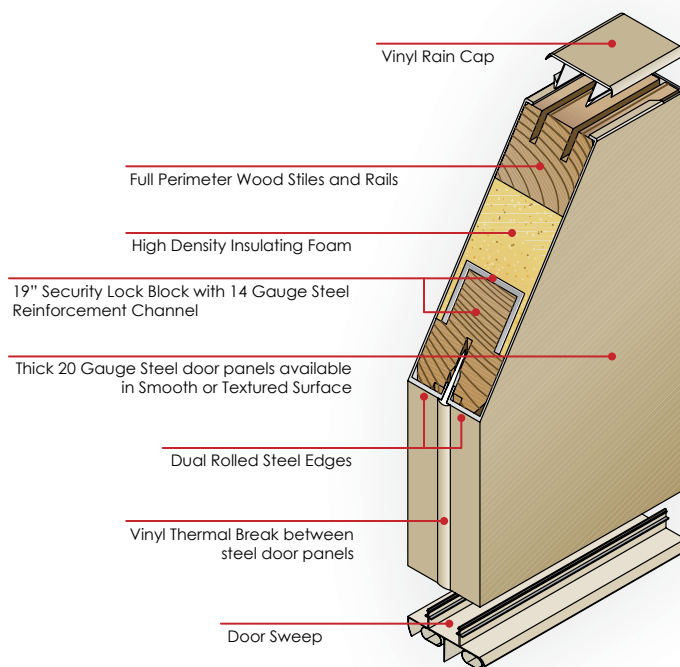

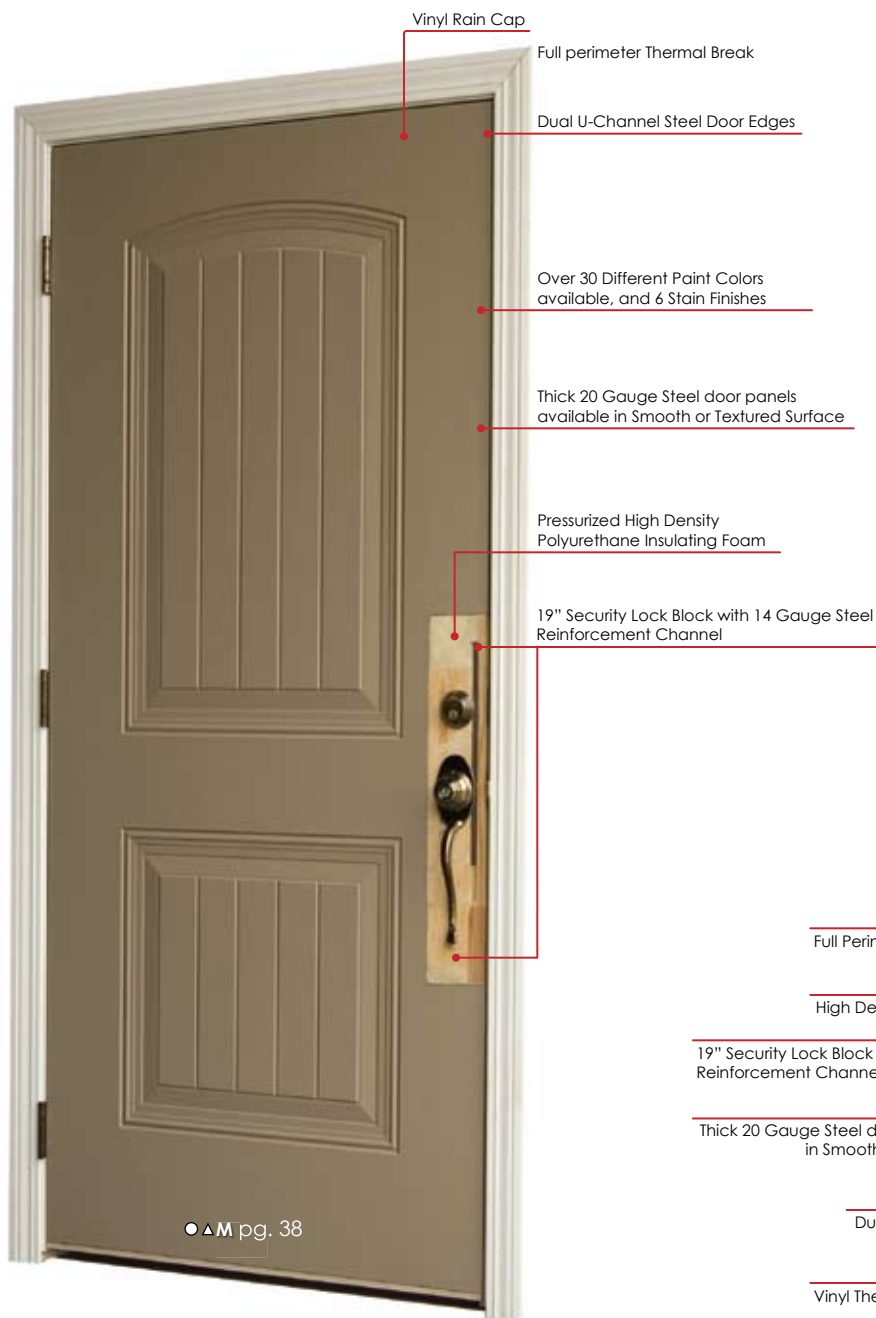

HMI ADVANTAGE

STEEL DOORS - ALL HMI STEEL DOORS ARE 20 GAUGE

The Dual U-Channel Steel Door Edges are custom made to the customer's specific door width and height instead of the conventional width-cut-down door slab. The 3-Dimensional design provides structural strength against warping and resistance against splitting from break-in attempts. A vinyl thermal break seals the full perimeter of the door providing greater insulation.

NEW CONSTRUCTION JAMBS

JAMBS

Primed Wood Jamb - Standard

4 9/16 Prime Wood Jamb STD

Available in 5 1/4, 6 9/16 and custom sizes

pg. 10-11

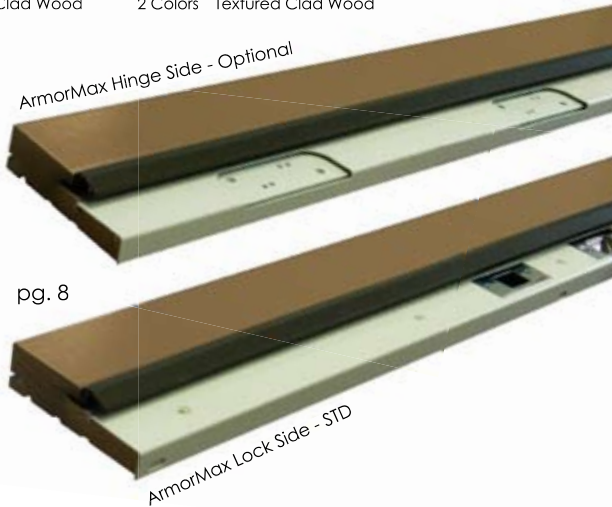

Painted or stained to match interior and exterior of the door.

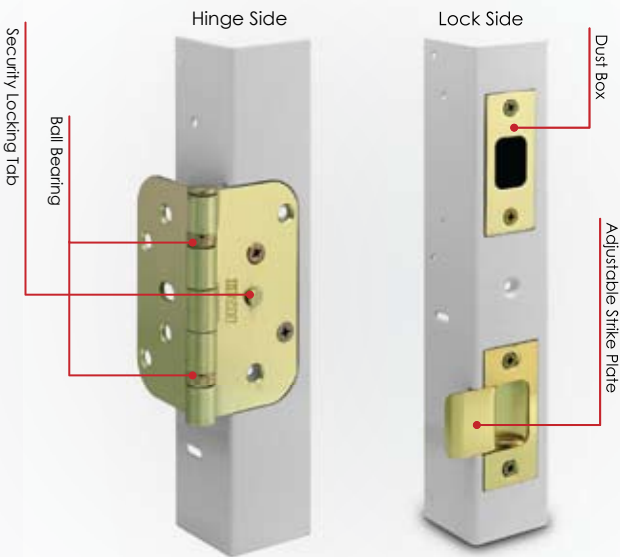

ARMORMAX JAMB™ Optional

Patent Pending

Replacement entry doors emerged on the marketplace during the 1970's. The steel "L" frame shored up the jamb giving it the security that homeowners desired. After listening to our dealer's concerns ArmorMax Jamb System™ was created to replicate that level of security in a new construction jamb. The 18 gauge steel "L" frame is embedded in the jamb on the lock side (hinge side is optional) giving it the strength and security of a replacement door.

pg. 8

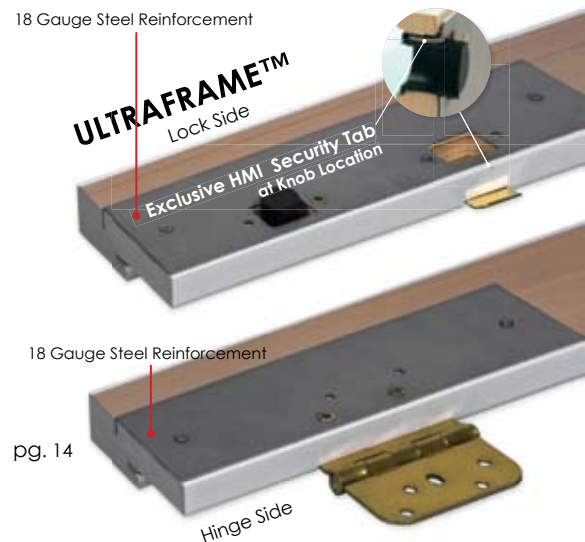

STEEL REPLACEMENT FRAME

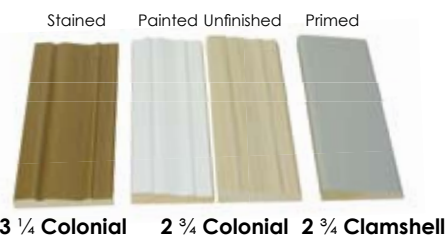

Steel Replacement Frames are constructed of 18 gauge galvanized steel with 10 gauge plates located on the lock and hinge sides for extra reinforcement to help keep intruders out. All replacement frames are finished with a powder coating. White is standard.

ULTRAFRAME™ REINFORCEMENT Optional

The Patented HMI Ultraframe™ has 18 gauge reinforcement steel plates placed behind the dead-bolt, knob, and 3 hinges. The steel reinforcement plates are constructed in an "L" shape, which provides strength for a stronger mounting point and resistance against break-ins.

pg. 14

INTERIOR CASING

Interior casing can be painted or stained; or unfinished for customer to finish.

pg. 9

10 POINT LOCKING SYSTEM - #40

Home is our safe shelter

It is a place where we find comfort. It protects our possessions, but more importantly it protects you and your family. Unfortunately, many homes are not as safe as they could be. Every 14 seconds a home is burglarized. In more than 50 percent of all residential burglaries, entry is gained through a door. High quality 20 gauge steel doors, locks and key control are your first line of defense against a break-in.

- 10 horizontal backsets, the center four have a 7/8" projection, the top and bottom sets have 3/4" projection
- 10 Gauge steel strike plate the entire length of the lock side
- Anti-pick and anti-drill proof
- European security keys can only be duplicated through HMI Doors by using a supplied security key card
- Concealed, tamper-proof deadbolts
- Available in replacement and new construction
- Available in doors up to 96" in height
- Available in smooth and textured steel doors
- Locks are factory installed (only handles installed on-site)

Existing unsightly secure door
HMI 10-Point will replace this

FRENCH SIDELITES

French Sidelites work just like our Double Doors, another innovative option by HMI.

Hinged on opposite sides of the jamb, French Sidelites allow for the sidelite and door to be opened simultaneously, providing a wider opening.

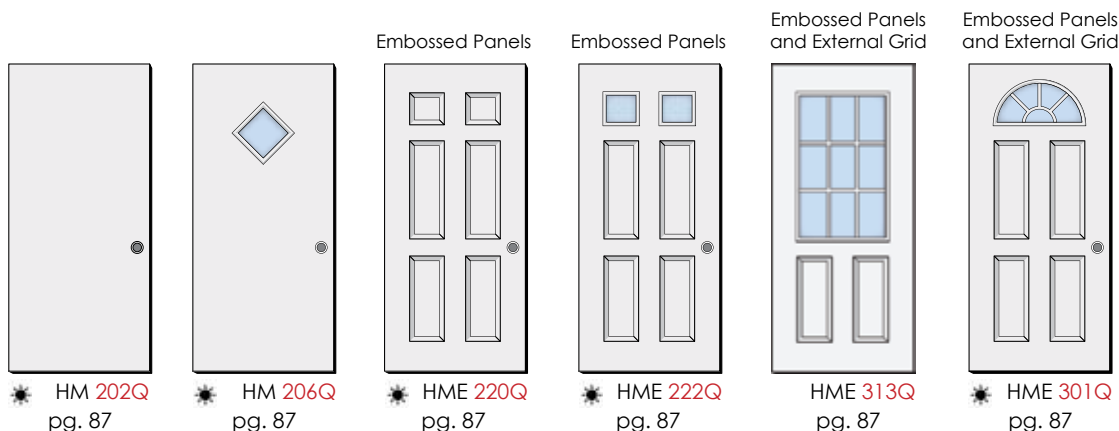

Enjoy the beauty of a classic door and sidelite with the practical space to move household appliances and furniture through.

◀ HME 258N Door and HS 242N Sidelite ▶

HMI QUICK SHIP DOORS

Available in 5 business days or less – Guaranteed! Quick ship doors are constructed of smooth 20 gauge steel; painted white; can be either inswing or outswing; are available with a steel replacement frame or new construction jamb; have clear glass; and polished hinges (standard, other finishes are optional). Available sizes are listed below each style Quick Ship door.

Note: These sample colors do not accurately reflect actual painted/stained or powdercoated surface colors due to limitations in the printing process. Please see your sales representative for HMI color chips.

HMI steel entry doors are 20 gauge galvanized to A40 and chem treated to prevent rusting. HMI steel and fiberglass doors are first primed with a durable undercoat that is oven-cured for lasting resiliency.

Paint - A final paint finish is applied to the doors and oven-cured a second time forming an enduring lustrous look.

Stain - Hand applied to textured doors to give a wood grain appearance, it is then top coated with a 2-part clear urethane protective coat containing a UV inhibitor. It is then oven-cured a second time forming an enduring lustrous look.

Powdercoat - Aluminum and security storm doors are chem washed then oven dried. The powdercoating is electrostatically applied and double baked to create a durable resilient finish. Powdercoats have a glossier sheen than do paints. See warranty for doors within 1 mile of shore line.

P - Matching Powder Coat finish for Aluminum and Security Storm Doors

X - Paint Finish available on Textured Doors Only - Black, Navy Blue and Hunter Green

* Due to possible heat buildup, the warranty for entry doors does not apply to the door or glass trim painted in these colors when installed behind storm doors.
